LOGOS & GRAPHICS REQUIREMENTS

DECEMBER 2019

Biller Integration
Logos & graphics requirements

48px

48px

The screenshot on the right is the UI where partners' logos will be displayed at the size of 48x48 @mdpi / 1x -
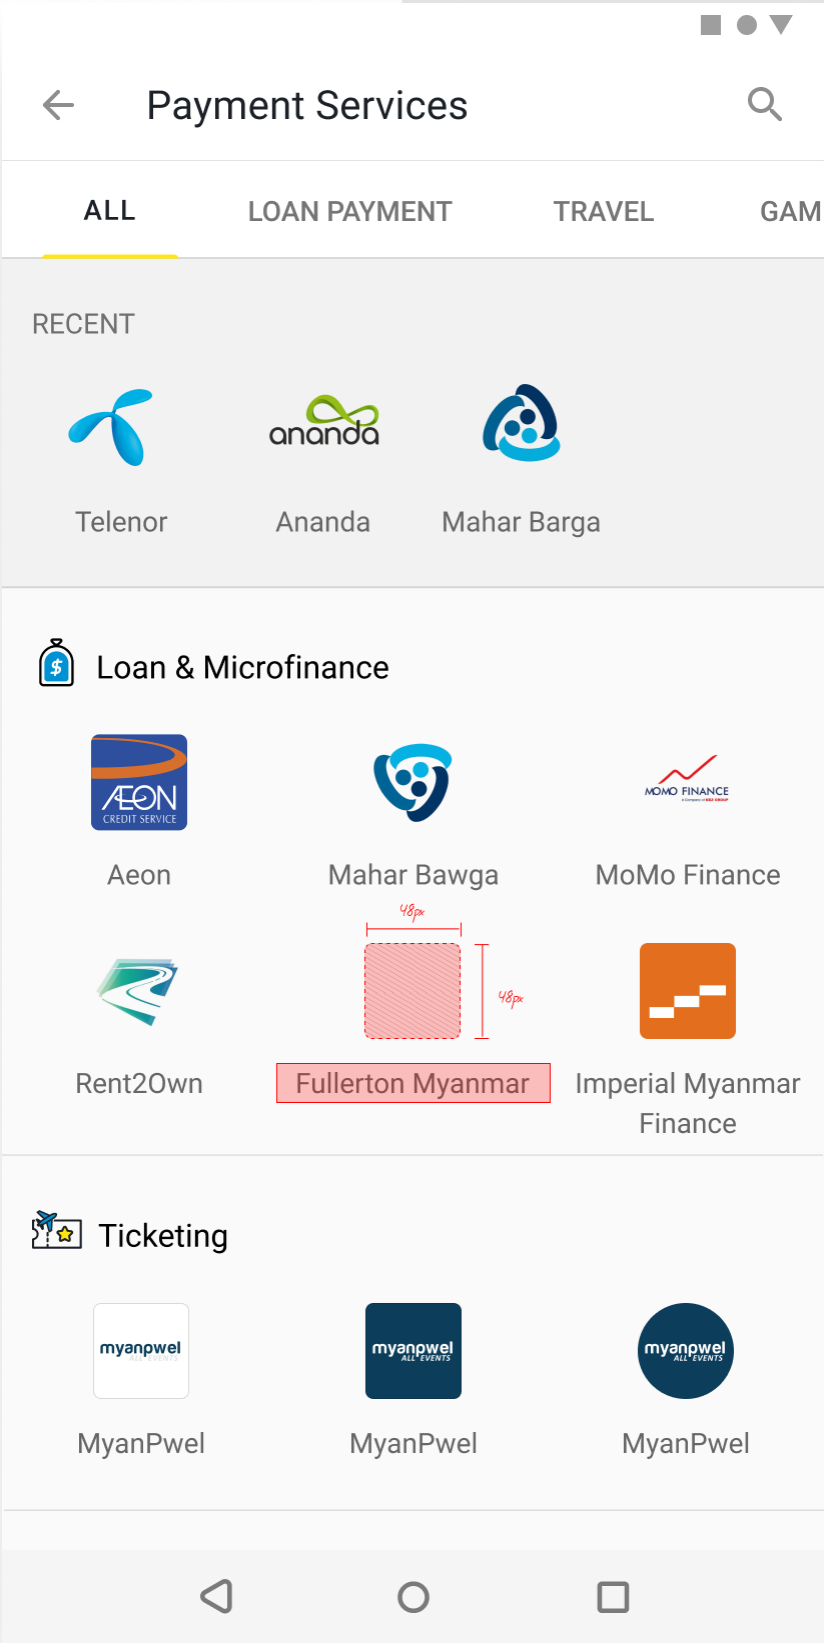

We recommend not having a lot of texts in the logo - It won't be readable unless its as big as **Ananda** or **Aeon** for example.

Background
The background container of this UI is going to be white so the white elements without a solid background color would not be visible.

File Format
Vector is always the best (svg,ai, etc.) but in some cases, if the vector format can't be provided. We need at least **512x512 image** in png format (without the background)

Icon treatment

Depending on partner's brand, logo. You can choose from one of the following formats.

01 Solid Logomark

If youre logo is solid and distinctive enough

like for example - **Telenor, Mahar Bawga**

We recommend going with this format.

ahar Barga   Telenor   Ooredoo   MPT

02 Circle & Rounded Corner

If your logo is horizontal (does not have a vertical format) or solid white.

We recommend using one of the treatments shown in the example below like **Myanpwel** with your brand color as a background on **cirlce or rounded corner** treatments.

MyanPwel   MyanPwel   MyanPwel
